

STEVEN SUKI

Software Developer

stevensuki64@gmail.com | +62 821-1457-0708 | [linkedin.com/in/steven-suki](https://www.linkedin.com/in/steven-suki)

PROFESSIONAL SUMMARY

Software developer with hands-on experience across the full development lifecycle, building and maintaining enterprise-grade applications spanning backend services, system integrations, and user-facing platforms. Comfortable working across the JavaScript/TypeScript ecosystem (Next.js, React, Node.js) as well as Golang, with a track record of adapting to backend, fullstack, and technical leadership roles depending on project needs. Currently serving as Technical Lead on a cloud-native platform project, combining strong technical execution with clear communication and effective coordination across client-based, fast-paced environments.

WORK EXPERIENCE

PT Ifabula Digital Kreasi

March 2025 – Present

Software Developer (Project-Based)

- Engaged in a series of client-based software development projects, taking on diverse roles and responsibilities tailored to each project's scope and technical requirements.
- Contributed as a developer on a client project, building and maintaining core system functionality to support business requirements.
- Expanded into a broader role on a subsequent project, handling both system logic and user-facing implementation to deliver features end-to-end.
- Developed and optimized core system components on another client project, with a strong focus on functionality, performance, and reliability.
- Served as Technical Lead on a client project, guiding technical direction, coordinating development efforts, and ensuring solutions aligned with client requirements.

PT Omni Digitama Internusa

Feb 2024 – Feb 2025

Backend Developer Intern

- Developed and implemented new features for internal systems and e-commerce platforms, collaborating with cross-functional teams to meet business requirements.
- Diagnosed and resolved both breaking and non-breaking bugs across production systems, improving application stability and reliability.
- Optimized backend code and database queries to enhance system performance and reduce response time.
- Maintained and refactored existing codebase to improve usability, readability, and long-term reliability.
- Designed and built an automation tool for QA testing, streamlining the testing process and reducing manual testing effort.

PROJECTS

Customer Consent Management Platform (Confidential Client)

Completed

Role: Backend Developer

A consent management platform enabling end-to-end handling of customer consent, Terms & Conditions, and Privacy Notices from creation and publication to collection, update, and revocation across multiple digital channels.

Tech Stack: Next.js, TypeScript, Tailwind CSS (Frontend) • Node.js, Express.js (Backend) • PostgreSQL (Database)

Corporate Website & CMS Platform (Confidential Client)

Completed

Role: Fullstack Developer

A company profile platform integrated with a custom-built CMS, allowing the client to manage and update website content independently without ongoing developer support.

Tech Stack: Next.js, TypeScript, Bootstrap (Company Profile) • Next.js, TypeScript (CMS Frontend) • Node.js, Express.js (Backend) • MySQL (Database)

Customer Ecosystem Integration Platform (Confidential Client)

Completed

Role: Backend Developer

A centralized data platform integrating information from various surrounding systems to enable consistent, personalized, and seamless customer experience management across the customer journey.

Tech Stack: Vite.js, TypeScript, Tailwind CSS (Frontend) • Node.js, Express.js (Backend) • SQL Server (Database)

Cloud-Native Application Delivery Platform (Confidential Client)

Ongoing

Role: Technical Lead, Frontend

A unified cloud-native platform consolidating traffic routing, ingress control, security enforcement, and monitoring into a single control layer, enabling automated service mapping and streamlined, observable application migration.

Tech Stack: Next.js, TypeScript, Tailwind CSS (Frontend) • Golang (Backend) • PostgreSQL (Database)

SKILLS

Frontend: Next.js, React.js, Vite.js, TypeScript, JavaScript, HTML/CSS, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, Golang, SQL, Sequelize, MongoDB, Mongoose, JWT, Microservices

Tools: Git, VS Code, Azure DevOps, Docker, Postman, Jenkins, SonarQube, AWS

Other: RESTful API, Agile Development, OIDC/SSO Integration, Role-Based Access Control (RBAC), CI/CD Pipeline

EDUCATION

Universitas Tarumanagara

2021 – 2025

Bachelor of Informatics Engineering — GPA: 3.97 / 4.00
